III. Project Details**Project Description**

With support from the Philippine Council for Agriculture and Fisheries (PCAF), the Development Academy of the Philippines (DAP) through its Center for Governance conducted a research on the implementation of land use classification and conversion and its implications to agricultural production of palay, corn, chicken and swine.

Specifically the project aimed to review legislation and policies that govern the conversion of agricultural land to other uses, and (1) analyze policy and implementation gaps; (2) describe trends in land conversion and identify push factors in the perspective of households and local governments in regions with high incidence of conversion; (3) explore how land conversion affects agricultural production of palay, corn, swine and chicken; and (4) identify policy weaknesses and opportunities, and recommend possible interventions.

Focus Area	Agricultural Policy
Project Type	Policy Research
Project Beneficiary	Agriculture Sector
Regional Coverage	Nationwide

IV. Project Accomplishments

Key Activities Implemented

1. Inception activities
2. Development of research design
3. Development of data gathering tools
4. Data gathering
5. Data processing and analysis
6. Presentation of results
7. Preparation and finalization of reports

Major Outputs

1. Inception Report
2. Presentation of Results
3. Final Report

Project Impact

Sustainable land use management towards food security, agricultural productivity, and sustainable rural development

Lessons Learned

All policy research projects must have a theoretical/conceptual framework prior to data gathering. This must be prepared together with the supervising fellow and experts and approved by MD Imelda Caluen or SVP Magdalena Mendoza.

An analysis plan must also be prepared at the start of the project. This will guide the researchers on what to collect during data gathering and on how data will be analyzed. This must be prepared together with the supervising fellow and experts and adjusted as actual data comes in.

Notes:

1. Project details on Section I-III can be generated thru PMIS based on PMs Inputs.
2. Project Managers are required to accomplish Section IV & provide Section V to reflect results of project implementation
3. Project Managers can update/adjust the pre-filled sections(I-III) based on actual data
